CT Transfer Set with Disinfectant Caps

Reduces hospital acquired line-associated infections
CT Transfer Set with Disinfectant Caps

Line-associated infections kill patients and are costly to hospitals, reaching more than $2.3 billion in non-reimbursable healthcare costs annually, and costing hospitals approximately $46,000 per infection treated. Our CT Transfer Set is now available with disinfectant caps, a convenient system designed for use on needle-free valves that reduces line-associated infections.

CLINICAL BENEFITS

Efficient
Passively disinfects the needleless luer access valve in 30 seconds

Disinfects
Contains 70% isopropyl alcohol to disinfect and protect connectors between uses

Protects
Provides a physical barrier to contamination for up to 7 days

Convenient
IV strip keeps disinfectant caps conveniently located at point of use

Time-Saving
Decrease turnaround time transferring contrast or saline into an injector syringe

Cost Savings
Gives the ability to use larger, more cost effective bottles of contrast
