Hemostasis Valves & Accessories

NOW AVAILABLE IN THE U.S.

PhD™ Hemostasis Valve with Sidearm Tubing

Dual-seal hemostasis valve that simplifies procedures with an easy one-handed push-and-hold mechanism, allowing insertion of interventional equipment while controlling bleedback. Valve rated up to 400 psi.

SPECIFICATIONS

Inner lumen: 0.096" (2.44mm)/7.3F
Extension tube length: 23cm (9")

PhD™ Hemostasis Valve

Dual-seal hemostasis valve that simplifies procedures with an easy push-and-hold mechanism, freeing your other hand to deliver interventional equipment. Valve rated up to 400 psi.

SPECIFICATIONS

Inner lumen: 0.096" (2.44mm)/7.3F

FLO40XR™

The FLO40XR Hemostasis Valve offers a shorter body and extension tubing as an additional feature. Valve rated up to 400 psi.

SPECIFICATIONS

Inner lumen: 0.096" (2.44mm)/7.3F
Extension tube length: 15cm (6")

FLO50™

The FLO50 Hemostasis Valve offers a shorter body maintaining a large bore inner diameter rated up to 400 psi.

SPECIFICATIONS

Inner lumen: 0.118" (3.0mm)/9F

FLO30™

Merit Medical's FLO30 Hemostasis Valve is a short-body adapter providing maximum working length when required.

SPECIFICATIONS

Inner lumen: 0.118" (3mm)/9F

Honor®

The easy push-pull mechanism of the Honor Hemostasis Valve allows single-handed manipulation to open and close the valve while introducing devices into the vasculature.

SPECIFICATIONS

Inner lumen: 0.094" (2.4mm)/7.2F

Access the right hemostasis options

AccessPLUS™

The AccessPLUS large bore hemostasis valve has optimal sealing surface for blood control.

SPECIFICATIONS

Inner lumen: 0.120" (3.1mm)/9F

DoublePlay™

Two large bore hemostasis ports allow easier manipulation and control of interventional devices during "kissing balloon" techniques.

SPECIFICATIONS

Main inner lumen: 0.120" (3.1mm)/9F

Passage®

The Passage represents the first of Merit's standard line of hemostasis valves.

SPECIFICATIONS

Inner lumen: 0.097" (2.5mm)/7.4F

Prelude Choice™ Universal Hemostasis Valve Adapter

With two separate valve openings, the operator can track and control multiple devices while maintaining a secure seal that stops leaks. Compatible with standard luer devices, such as guide catheters and guiding sheaths with standard luer connections:

MBA™ - Merit's Bleedback Alternative™

A premier hemostasis valve that features two seals. A conventional "touhy" silicone hemostasis valve provides security that the interventional device will stay in place. The secondary slit seal delivers a virtually bloodless procedure.

SPECIFICATIONS

Inner lumen: 0.118" (3mm)/9F

Hemostasis valves and accessories are also available with any Merit inflation device. Kits are available in standard catalog numbers as well as custom kit configurations.

Visit merit.com/healthtrust/inflation-devices for more information on the following devices:
