

# CLOSURE PLUS PROTECTION

**Clo-Sur P.A.D.™ and  
Clo-Sur<sup>PLUS</sup> P.A.D.™**

*Pressure Applied Dressings*

# Clo-Sur P.A.D.<sup>™</sup> and Clo-Sur<sup>PLUS</sup> P.A.D.<sup>™</sup>

Following catheterization, achieving hemostasis with manual compression can be time-consuming and costly. Patients are also at increased risk for catheter-related blood stream infections (CRBSI)<sup>1</sup>. The Clo-Sur P.A.D. accelerates hemostasis. The Clo-Sur<sup>PLUS</sup> P.A.D. antimicrobial dressing protects skin surface puncture sites against nosocomial infection.

Clo-Sur<sup>PLUS</sup> P.A.D. provides 6 day antimicrobial barrier protection on skin surface puncture sites.

## CLOSURE PLUS PROTECTION

### CLOSURE

Non-woven topical pad made with a proprietary polypropylene, a positively-charged with known hemostatic activity that expedites clot formation.

Faster hemostasis leads to decreased hold time and time to ambulation.

Can also be used for patients on anticoagulation therapy.

<sup>1</sup> <http://www.safecarecampaign.org/CRBSI.html>

<sup>2</sup> Eur Radiol, 2007 Mar 17(3):693-700.

<sup>3</sup> WuXiAppTec Report 867961 May 31, 2011.

Unlike other vascular closure devices, the Clo-Sur P.A.D. and Clo-Sur<sup>PLUS</sup> P.A.D. have no contraindications and can be used by patients with known sensitivity to bovine-derived materials.

Water soluble for painless and easy removal, which is more comfortable for the patient.

### PLUS PROTECTION

Clo-Sur<sup>PLUS</sup> P.A.D. provides an antimicrobial barrier for up to 6 days.

Can be used as antimicrobial wrap around indwelling lines to protect skin surface puncture sites.

### MICROBIAL ASSAYS TEST RESULTS<sup>3</sup>

ORGANISM	7 DAY INCUBATION		
	REPLICATE 1	REPLICATE 2	REPLICATE 3
A. brasiliensis	No Growth	No Growth	No Growth
B. cereus	No Growth	No Growth	No Growth
