ONE STOP DRAINAGE SHOP™

EVERYTHING YOU NEED FOR DRAINAGE PROCEDURES

ReSolve®

LOCKING DRAINAGE CATHETER

Designed for abscess, nephrostomy and miscellaneous drainage procedures, the ReSolve locking drainage catheter comes packaged with a metal stiffening cannula, a plastic stiffening cannula, and a trocar stylet.

Catheter tip positioned within pigtail curve to reduce tissue irritation.

Depth markers located on the catheter shaft aid accurate placement and act as a reference for correct positioning.

Large drainage holes to maximize drainage.

Tapered tip and hydrophilic coating for a smooth introduction to reduce patient discomfort.

Color-coded hubs that match standard French sizing charts for easy identification.

Flexible polyurethane material to prevent kinking and ensure excellent catheter rebound.

Pigtail straightener allows for easier insertion of stiffening cannulas.

Repositioning Tool (included) for unlocking and repositioning the catheter at any time.

Highly flexible radiopaque marker band, integral to the catheter shaft, forged from platinum.

ReSolve®

NON-LOCKING DRAINAGE CATHETER

Designed for drainage of abscess, nephrostomy, and miscellaneous drainage procedures, the ReSolve comes in a J or straight tip and is packaged with a metal stiffening cannula and a trocar stylet.

Large drainage holes to maximize drainage.

Tapered tip and hydrophilic coating for a smooth introduction to reduce patient discomfort.

Color-coded hubs that match standard French sizing charts for easy identification.

Flexible polyurethane material to prevent kinking and to ensure excellent catheter rebound.

ONE STEP™

VALVED ONE-STEP CENTESIS CATHETER

The self-closing valve prevents air infiltration and fluid leakage. When activated with a luer, the valve fully opens to allow maximum flow.

Self-closing valve prevents air infiltration and fluid leakage.

Four large holes spiral around catheter to maximize drainage.

Tapered tip for a smooth introduction to reduce patient discomfort.

Echo-enhanced needle for increased needle visibility.

Bevel indicator gives a tactile and visual reference for bevel orientation.

Clear hub increases flashback visibility with ergonomic design for easy gripping and handling.

ONE 1 STEP ™

ONE-STEP CENTESIS CATHETER

For ease of insertion, the One-Step centesis catheter has a smooth transition for decreased resistance and an echo-enhanced needle for more accurate placement.

Available with luer locking or slip fit needle.

Four large holes spiral around catheter to maximize drainage.

Tapered tip for a smooth introduction to reduce patient discomfort.

FEP material resists buckling for a smooth insertion.

Unique hub design for easy gripping and handling during procedure.

Echo-enhanced needle for increased needle visibility.

MERIT *MAK NV*™

MINI ACCESS KIT NON-VASCULAR

Excellent transitions for a smooth introduction.

Radiopaque marker tip clearly shows tip of introducer.

Superior tip design decreases buckling and introducer peel back during insertion.

Echo-enhanced needle increases visualization for ultrasound placement.

4F introducer ID allows 0.018" guide wire to be left in place for safety during larger wire placement.

REVOLUTION™

CATHETER SECUREMENT DEVICE

Saves time, provides convenience and enhances compliance with safety regulations for securing catheters with a needleless procedure.

Secures non vascular catheters from 6F-24F.

Hydrocolloid is absorbent around puncture site, and conforms well to body anatomy.

Provides safe and secure fixation for up to 7 days.

Included shower cap covers insertion site for added protection while showering.

Catalog Number
CFG624
Packaged 25 per box

StayFIX®

FIXATION DEVICE FOR PERCUTANEOUS CATHETERS*

StayFIX fixation device design secures catheters in place without the use of sutures, reducing the exposure to sharps and sharps-related accidents.

Secures non-vascular catheters from 5F - 22F.

Provides safe and secure fixation for up to 7 days.

Catalog Number
680ME 5F-14F - Packaged 25 per box
685ME 12F-22F - Packaged 20 per box

* Distribution agreement limits sales to selected countries. Contact Customer Service.

Drainage Bags

These bags come with a VELCRO® brand strap and are designed with patient mobility and comfort in mind.

Adjustable length tubing to fit a variety of patients
Cloth backing for patient comfort
Twist valve for easy disposal of fluids
Easy-to-read markings to identify fluid volume
Internal anti-reflux valve prevents backflow

MDD600 - 600 mL bag
FZ624 - 600 mL cloth-backed bag
Packaged 20 per box

K10-03450 - MDD600 drainage bag with Jackson-Pratt®
100 mL bulb designed for vacuum drainage
Packaged 10 per box

Abscess Drainage Kit

K10-00230B - OSHA-compliant closed waste system
with 1400 mL MDD bag, tubing and CRV Valve
Designed for quick and safe drainage elimination.
Packaged 15 per box

Drainage Connector Tubing

K10-04129 - 30 cm connecting tubing
K10-04130 - 42 cm connecting tubing
K10-04131 - 30 cm connecting tubing with one-way stopcock
K10-04132 - 42 cm connecting tubing with one-way stopcock
Packaged 25 per box

Drainage Tubing

FAS5248 - 48″ large bore tubing with pinch
clamp and non-vented spike
Packaged 25 per box
K10-04750 - 48″ large bore tubing with roller
clamp and 16G X 1.5″ (38.1 mm) needle
Packaged 15 per box

Valve Adapter

VA-40 - Designed to be back loaded over a guide
wire and attached to the MAK-NV to facilitate
aspiration or infusion. Accepts up to a 4F device
Packaged 10 per box

Large Bore Stopcocks

Clear body with large lumen designed to
increase flow rate.
L3SNC - 3-way large bore stopcock
L4SNC - 4-way large bore stopcock
Packaged 50 per box

VacLok® Syringes

Patented clear body design with multiple locking positions.
Maintains negative pressure while reducing physician strain.

VAC120 - 20 mL VacLok Syringe
VAC130 - 30 mL VacLok Syringe
Packaged 20 per box

VAC110 - 10 mL VacLok Syringe
VAC160 - 60 mL VacLok Syringe
Packaged 25 per box

WASTE BASINS AND GUIDE WIRES

BackStop®

BackStop MBS100 and BackStop+™ MBSP100

The OSHA-compliant BackStop and BackStop Plus waste basins are designed with particulate-free materials, a seal tight-lid and a 500 mL fluid capacity. Designed for quick and safe drainage disposal. Packaged 10 per box

MiniStop®

MiniStop MMS100 and MiniStop+™ MMSP100

The OSHA-compliant MiniStop and MiniStop Plus waste basins are designed with particulate-free materials, a seal tight lid and a 100 mL fluid capacity. Designed for smaller drainage procedures. Packaged 20 per box

DugOut®

DugOut DUG100

The OSHA-compliant DugOut waste basin is designed with particulate-free materials, a secondary compartment for storage of ancillary products or saline and a seal tight lid with a 1000 mL fluid capacity. Designed for quick and safe disposal of the largest volume drainage procedures. Packaged 6 per box

InQwire®

GUIDE WIRES

InQwire® guide wires are precoated, creating a smooth, consistent surface for drainage catheters to track over.
80 cm length reduces excess wire and risk for contamination.

SAFETY PARACENTESIS PROCEDURE TRAY*

includes necessary products to complete a paracentesis procedure, including three safety needles to ensure a safe working environment.

TRAY COMPONENTS

1 each	One-Step™ centesis catheter (either 5F 7 cm or 5F 10 cm)
1 each	Fenestrated Drape w/ Adhesive Backing
1 each	Absorbent Paper Towel
1 each	ChloraPrep®
1 each	20 mL Lidocaine HCI Injection USP 1%
1 each	18G x 1″ (25.4 mm) Shielded Needle
1 each	25G x 1″ (25.4 mm) Shielded Needle
1 each	22G x 1.5″ (38.1 mm) Shielded Needle
1 each	10 mL Luer Lock Syringe
10 each	Gauze 4″x4″
1 each	#11 Futura® Safety Scalpel
1 each	60 mL BD Luer Lock Syringe
2 each	Specimen Vials (10 mL)
1 each	Non-Vented Female Cap
1 each	Large Bore Stopcock (3-way)
1 each	Tubing Set, 48″ (122cm) with Pinch Clamp and Non-Vented Spike
1 each	Bandage Dressing (1″ x 3″)
1 each	CSR Wrap
1 each	10 mL Medallion® Luer Lock Syringe
1 each	Lidocaine Label
