

Drainage solutions
to meet your needs.

CONTROL
THE FLOW

Decreased Buckling and Peel-Back

Tip design offers smooth insertions.

Accurate Placement

Radiopaque marker tip clearly shows introducer tip.

Increased Visualization

Echo-enhanced needle boosts visualization during ultrasound placement.

Chiba Needle

Trocar Needle

Safety During Large Wire Placement

4F introducer ID allows 0.018" guide wire to be left in place.

Achieve quick access into the drainage area with the MAK-NV[™], a mini access introducer system for non-vascular applications. Made for placement of large-diameter guide wires, its tip design offers you excellent transitions for a smooth insertion.

Accurate Placement

Internal radiopaque marker band shows transition from drainage catheter to stent.

ReSolve ConvertX® is designed to provide your patients with severe biliary or ureteral obstructions a less-invasive treatment option by removing the need for a second invasive procedure and uncomfortable external drainage bag. Place it like an internal-external drain. Convert it to a stent when ready.

**STENT RELEASE
IN LESS THAN 30 SECONDS¹**

ReSolve® Locking Drainage Catheters are designed to help you provide abscess and miscellaneous drainage care. A hydrophilic-coated tapered tip inside the pigtail curve supports smooth introductions to reduce discomfort and prevent tissue irritation. Large drainage holes help keep your drainage procedures efficient while still maintaining catheter patency.

Packaged 5 per box. | Max guide wire: 0.038" (0.97 mm) | Packaged with a metal stiffening cannula and a trocar stylet.

Our ReSolve® Biliary Locking Drainage Catheter is designed to provide you with fast, unimpeded drainage. With multiple large holes, different size configurations, and up to 64% more drainage area than other drainage catheters,¹ it offers maximum drainage for your procedures.

Reduced Tissue Irritation

Atraumatic internal pigtail designed to prevent tissue irritation.

Made for Varying Patient Anatomy

Two drainage hole patterns accommodate multiple lesion locations.

Fast and Accurate Positioning

Built with depth markers and a radiopaque marker band.

| | 1- ShortStop® Temporary Sharps Holder | |

Ergonomic Handle

Allows you to start, stop, and regulate flow. Easy to remove, minimizing spills during discard.

Easy Sampling

Connect syringe and open handle to remove fluid for sampling.

Engineered with an advanced design, the One-Vac® is the smart option when choosing an evacuated drainage bottle. Built with a number of key features, the One-Vac makes percutaneous fluid collection and discard simple, efficient, and safe.

ONE-VAC® EVACUATED DRAINAGE BOTTLE

Catalog Number	Product Description
EVAC1000	Bottle, 1,000 mL volume
48MMT†	Drainage Tubing: 48" large bore tubing with pinch clamp and male luers

Packaged 10 units per box. † Packaged 15 per box.

Bottle Neck

Easy to hold.

Up to **68%** faster flow rates than competitive evacuated bottles¹

Durable Plastic

Designed to prevent breakage.

Designed for your patient's safety, the Valved One-Step® Centesis Catheter has a self-sealing valve to minimize the risk of air entering the pleural space and to prevent fluid leakage.¹ When activated with a luer, the valve fully opens to maximize flow during your thoracentesis and paracentesis procedures.

Maximize Drainage

Four large holes support maximum drainage for efficient procedures.

Increased Visibility

Echogenic needle boosts visibility.

Minimize Drainage-Hole Occlusion

Pigtail designed to reduce drainage-hole occlusion from tissues.

User-Friendly Design

Ergonomic for easy gripping and handling.

Detect Flashback

Clear hub increases flashback visibility.

Tray with: No Catheter = N | Pigtail Catheter = P | Straight Catheter = S

Offer a compassionate home treatment option to your patients with the Aspira® Drainage System. Designed to relieve symptoms of recurrent pleural effusions and malignant ascites, the Aspira system offers an average 68% higher flow rate^{1,3,4} over competing drainage systems, giving your patients more time to do the things they enjoy.

ASPIRA® DRAINAGE SYSTEM

Peritoneal (15 cm from cuff to proximal fenestra- tion)	Pleural (11 cm from cuff to proximal fenestra- tion)	Description

4992307*	Universal Tubing Adapter

* Packaged 5 units per box ** Packaged 4 units per box *** Packaged 10 units per box

CATHETER INSERTION ACCESSORIES KIT

Catalog Number	Description
K20T-00033	Contains additional accessories to help with catheter insertion.

Packaged 6 units per box

PRELUDE SNAP165

VALVED SPLITTABLE SHEATH INTRODUCER

Catalog Number	Description
PLS165	Valved Splittable Sheath Introducer, 16.5F

Packaged 10 units per box. Requires 6–8 weeks lead time.

Simple Design

Ideal for patients and caregivers. Initiate drainage with its low vacuum, siphon-activating pump.

Patient Comfort

Gravity-based design with siphon assist produces a consistent pressure flow to minimize your patients' discomfort.

Lightweight and Compact

1-L drainage bag requires less storage space than other home drainage products.⁵

Reparable

Easy to repair valve if damaged.

71% less storage space.⁵

Twenty Aspiria Drainage Bags and dressings require approximately the same amount of space as one box of four PleurX™ Bottles and dressings, reducing storage space and waste.

StayFIX®

Fixation Device

Reduce your exposure to sharps and sharps-related accidents with the StayFIX® Fixation Device, allowing you to secure catheters in place without the use of sutures.

- Secures non-vascular catheters from 5F–22F
- Provides safe and secure fixation for up to 7 days

STAYFIX® FIXATION DEVICE

Catalog Number	Description
680ME*	5F–14F
685ME**	12F–22F

* Packaged 25 per box. | ** Packaged 20 per box.

DRAINAGE BAGS AND TUBING

Merit offers a selection of drainage bags and tubing to meet your specific drainage needs.

Easy-to-Read Markings
Identify fluid volume at a glance.

Prevents Backflow
Built with an internal anti-reflux valve.

FZ624

Easy Disposal Design
Twist valve for disposal of fluids.

Fits a Variety of Patients
Adjustable length tubing to meet patient needs.

Catalog Number	Description
DRAINAGE BAGS	
MDD600*	Bag, 600 mL
MDD600PML*	Bag, 600 mL (with polypropylene luer)
FZ624*	Cloth-backed Bag, 600 mL
K08-01907**	Jackson-Pratt® Bulb with 16" Tubing, 100 mL
K10-03450**	MDD600 Drainage Bag with Jackson-Pratt® Bulb, 100 mL (designed for vacuum drainage)

* Packaged 20 per box. | ** Packaged 10 per box. | † Packaged 15 per box. | ‡ Packaged 25 per box.

VAC160

With a variety of accessory products to meet your drainage procedure needs, Merit is your partner in drainage care.

VACLOK®

Vacuum Pressure Syringe

Featuring a clear body design with multiple locking positions, our VacLok® Vacuum Pressure Syringe maintains negative pressure while reducing physician strain—allowing you to focus on your patients.

VACLOCK® SYRINGES

Catalog Number	Description
VAC110**	VacLok® Syringe, 10 mL
VAC120*	VacLok® Syringe, 20 mL
VAC130*	VacLok® Syringe, 30 mL
VAC160**	VacLok® Syringe, 60 mL

* Packaged 20 per box. | ** Packaged 25 per box.

DILATORS

Catalog Number	Description
K12-08322	8F x 20 cm
K12-08323	10F x 20 cm
K12-08324	12F x 20 cm
K12-08325	14F x 20 cm

Packaged 10 per box.

LARGE BORE STOPCOCKS

A clear body with large lumen is designed to increase the flow rate of your drainage procedures.

Catalog Number	Description
L3SNC	3-way Large Bore Stopcock
L4SNC	4-way Large Bore Stopcock

Packaged 50 per box.

ACCESS NEEDLE

Catalog Number	Description
K12-08326	Chiba, 18G x 15 cm

Packaged 10 per box

DRAINAGE ACCESSORIES

FastBreak™
Breakaway Connector

Reduce the risk of your patient’s drainage catheter dislodging. The FastBreak™ Breakaway Connector detaches at the connector site rather than causing injury to an organ, soft tissue, or compromising drainage treatment.

Catalog Number
FBG10

Packaged 10 per box.

RLS™
ReSolve Label Set

Let Merit’s RLS™ help you minimize errors related to the management of drainage catheters. By clearly listing drain type, location, and date of placement, our label sets help you standardize and improve patient care.

Catalog Number	Description
RLS100	5 Labels (orange) with Pen

Packaged 25 per box.

WASTE BASINS

Achieve quick and safe fluid waste elimination with our innovative waste basins. Seal-tight lids prevent fluid leakage after your procedures, and a particulate-free design allows for use in all surgical environments.

BackStop®

Disposal System

Our BackStop® Disposal System is designed with a seal-tight lid to prevent fluid leakage after your procedures, providing quick and safe waste elimination.

Catalog Number	Description
MBS100	Waste Basin, 500 mL
MBSP100	Waste Basin with Temporary Sharps Holder, 500 mL

Packaged 10 per box.

MiniStop®

Disposal System

MiniStop® Disposal Systems are a solution for your smaller drainage procedures. A seal-tight lid prevents fluid leakage, providing you quick and safe fluid waste elimination.

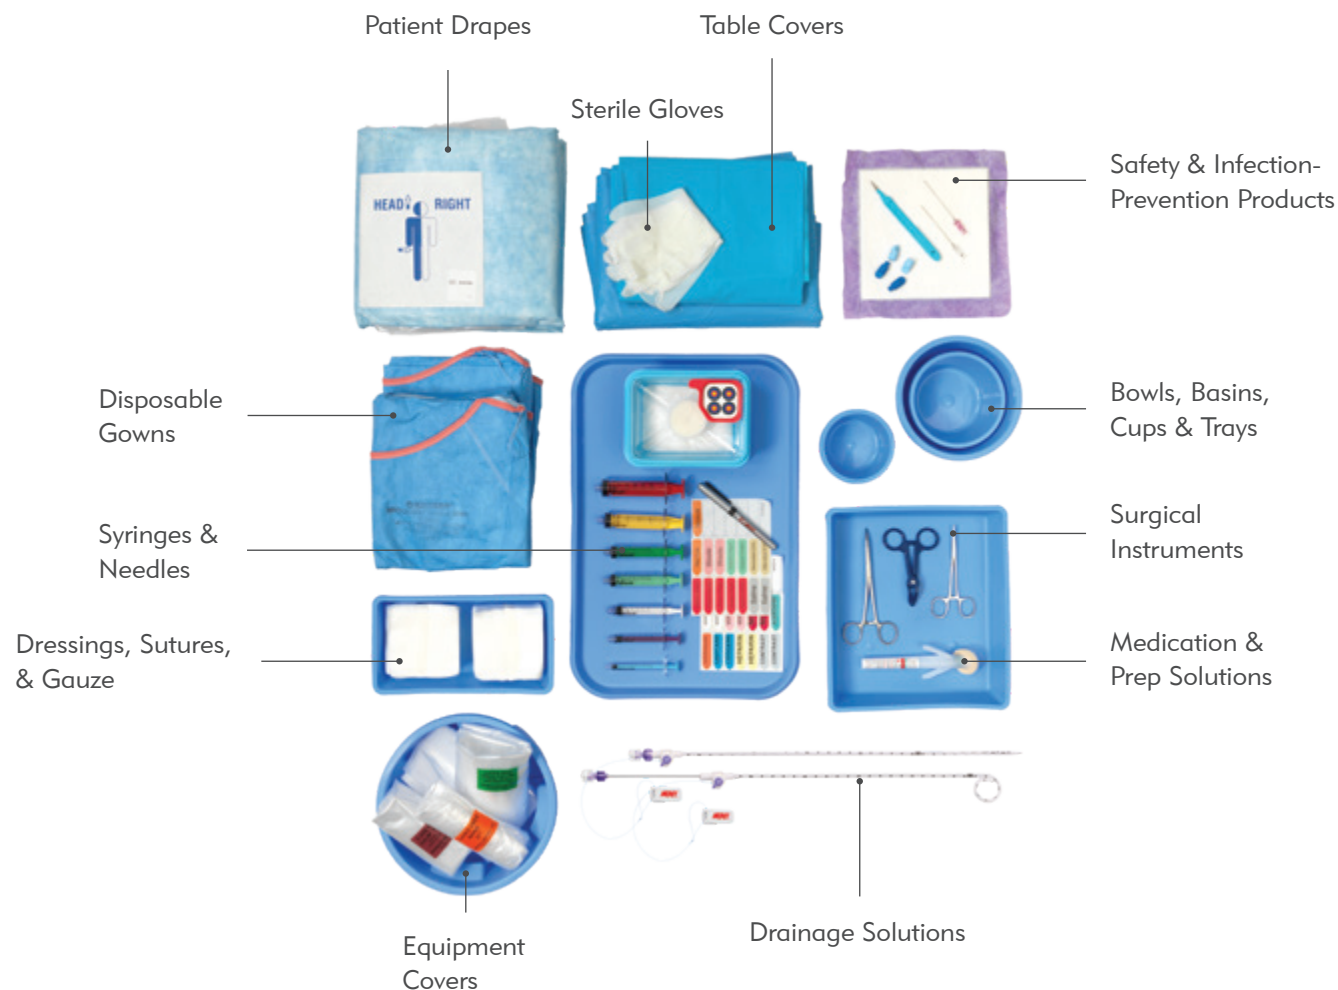

Catalog Number	Description
MMS100	Waste Bin, 100 mL
MMSP100	Waste Basin with Temporary Sharps Holder, 100 mL

Packaged 20 per box.

OPTIMIZE YOUR DRAINAGE PROCEDURE

Trays, kits, and packs are **EFFICIENT**, timesaving, and cost-effective. We offer numerous pre-arranged options or will work with you to create an assortment that **UNIQUELY** meets your needs and provides **EVERYTHING** you require to perform the drainage procedures you do most.

Visit merit.com/drainage, or contact your Merit Representative to learn more.
