

**SPEED.
SAFETY.
STABILITY.**

Vitale[™]
Occlusion Balloon

TIMING IS EVERYTHING

SVC tears are rare, but when they occur every second counts. The Merit Vitale™ Occlusion Balloon maintains hemostasis for up to 30 minutes allowing time for patients to stabilize and transition to surgery.

Speed of inflation

Faster inflation to ensure any tear is occluded promptly.¹

Faster deflation

When the surgical team is ready they can approach the repair in a controlled setting with a clear field of view.¹

Better kink resistance

To ensure any tear is occluded timely the Vitale Occlusion Balloon has better kink resistance to ensure proper placement.¹
