

SCOUT® Ultrasound Delivery System

More control for easy, single-hand deployment

The SCOUT Ultrasound Delivery System is designed to provide clinicians:

- OUTSTANDING control and ease of use with an ergonomic handle
- EXCELLENT visualization with intuitive needle bevel orientation
- EASY single-hand deployment with large tactile release button
- PRECISE delivery system for accurate localization

NEEDLE TIP UNDER ULTRASOUND

SCOUT is uniquely suited for placement in tumors and lymph nodes prior to neoadjuvant treatment or at the time of biopsy

- The reflector has a clinically insignificant MRI artifact, so patients are not restricted in the types of imaging modalities they may need
- No restrictions on the length of time the reflector can remain implanted
