

SOLOPACE™

Temporary Pacing System

PRECISION PACING WITH CONFIDENT CONTROL

SoloPace CONTROL is designed to bring precision and confidence to your transcatheter heart valve (THV) procedures. A suite of innovative features are designed to offer efficiency and reduce pacing risk for a more standardized and simplified workflow.

DISCOVER THE SOLOPACE CONTROL ADVANTAGE

Innovative Design

Standardize temporary pacing with operator-specific protocols, automated pace capture checks, sterile remote-control operation, and simple visual indicators.

Improved Efficiency

New technology automates THV temporary pacing, seamlessly moving you through the stages of your procedure.

Designed to Reduce Pacing Risk

Decrease the risk of communication errors that can lead to preventable pacing-related complications.

Compatible with patient cables for all common procedural pacing methods

Remote control from the sterile field

ORDERING INFORMATION

Catalog Number	Description	Packaged
SOLOEPG1	SoloPace Control System	1 per box
SOLORCM	SoloPace Control System Remote Control Module	1 per box*

* Minimum order quantity is 10 units

Data on File.
