CENTESIS CATHETER
INSTRUCTIONS FOR USE

DESCRIPTION OF THE PRODUCT
The One-Step Centesis Catheter is a short-term drainage catheter, available in straight, pigtail, valved and non-valved configurations with introducer needle.

INDICATIONS FOR USE
The One-Step Centesis Catheter is indicated for the percutaneous drainage of fluids.

CONTRAINDICATIONS
None known.

PRECAUTIONS
• Read manufacturer’s instructions prior to use
• Caution: Federal (USA) law restricts this device to sale by or on the order of a physician trained and/or experienced in the use of the device.
• Contents of unopened, undamaged package are sterile.
• Do not leave in patient longer than 24 hours.
• Store in a cool, dry place.
• Do not re-use after expiration date.
• For single patient use only. Do not re-use, reprocess or resterilize.
• Re-use, reprocessing or resterilization may compromise structural integrity of the device and/or lead to device failure which, in turn, may result in patient injury, illness or death.
• Re-use, reprocessing or resterilization may also create a risk of contamination of the device and/or cause patient infection or crossinfection, including, but not limited, the transmission of infectious diseases from one patient to another. Contamination of the device may lead to injury, illness or death of the patient.

ADVERSE REACTIONS
• Pneumothorax
• Bleeding complications
• Re-expansion pulmonary edema

INSTRUCTIONS FOR USE—PIGTAIL CATHETER
1. Remove the needle from the protective boot.
2. Insert the needle into catheter.
3. Insert the needle through the catheter until the needle hub is fully seated in the catheter hub.
4. Remove the distal obturator from the needle prior to inserting catheter into patient. (see Figure 1)

Figure 1
Warning: Do not re-attach distal obturator to needle.
5. Insert catheter into fluid collection site using standard insertion technique.
6. When in appropriate position, remove needle from catheter.
7. Attach a device with a standard Luer fitting to catheter hub to remove fluid.
8. Following the procedure, gently withdraw the catheter and dress the site accordingly.

INSTRUCTIONS FOR USE—STRAIGHT CATHETER
1. Remove the catheter and needle from protective boot(s).
2. Insert the needle through the catheter until the needle hub is fully seated in the catheter hub.
3. Remove the distal obturator from the needle prior to inserting catheter into patient. (see Figure 2)

Figure 2
Warning: Do not re-attach distal obturator to needle.
4. Insert catheter into fluid collection site using standard insertion technique.
5. When in appropriate position, remove needle from catheter.
6. Attach a device with a standard Luer fitting to catheter hub to remove fluid.
7. Following the procedure, gently withdraw the catheter and dress the site accordingly.
